

Wabash Park Camp & Retreat Center

Lot Lessee Codes and Guidelines

PURPOSE STATEMENT

“The purpose of the Wabash Park Camp & Retreat Center is to provide a unique variety of camping programs and facilities to create maximum opportunities for evangelism, nurture, and in-depth fellowship in a camp setting, thereby assisting our local churches, strengthening the family ties between those churches, and focusing on our common unifying goals.”

Wabash Park Camp & Retreat Center
304 East County Road 650 South, Clay City, IN 47841
Jason Joles, Facilities Manager (812-881-1789)
John Lancaster, Director of Camping (812-691-1094)

Wabash Conference office (317-831-0022)
P.O. Box 40, Mooresville, IN 46158

Revised October 2019

WINTER USE OF THE WABASH PARK CAMP & RETREAT CENTER

- Between November 1 and March 31 (when Wabash Park Camp & Retreat Center lot lessee area utilities are turned off) Lot Lessees will not have access to their cabins/trailers except for the purpose of necessary cabin/trailer maintenance/renovation/repairs. The Lot Lessee will provide advance notice to the Camp Facilities Manager of any work to be done and the time needed to accomplish that work.

BUILDING CODES

- Cabins must conform to the State of Indiana Building Codes.
- Cabin building plans must be approved by the Camp Director, Facilities Manager, and Conference Office prior to beginning construction.
- Cabins must have a minimum of R-13 insulation in walls, and R-19 insulation in the ceiling.
- Mobile units shall not be permanently placed without prior approval of the Camp Director, Facilities Manager, and Conference Office.
- Cabin and/or mobile unit changes and/or additions must be approved by the Camp Director, Facilities Manager, and Conference Office prior to construction, and construction must be of quality workmanship.
- New cabins shall not be less than 14 x 16 feet in dimension or 224 square feet on the main floor.
- Cabins and mobile units will be a minimum of 2 feet set back from the side and the court lot lines, and 5 feet set back from the road side line (or utility easement area) of the lot.
- Under no circumstances will construction encroach upon utility easement areas.
- Cabins, mobile units, and lots leased must be kept in good repair and have an attractive appearance. We reserve the right to require removal of cabins and mobile units not meeting these requirements.

Permanent Mobile Unit Description and Codes:

A permanent mobile unit is defined as any travel trailer or mobile home that is left on the campground all year long. Effective January 1, 2015, mobile units may only be permanently placed on lot numbers 450 or higher.

ELECTRICAL CODES

There are two basic types of electrical service provided to the Lot Lessee by the WPC&RC - cabin hook-up and/or RV hook-up.

Guidelines for cabin electrical hook-up:

- Cabins must conform to the State of Indiana building codes.
- New connections must be approved by the Facilities Manager.
- Cabins shall have a weather-head 8 feet from ground level or higher.
- Cabins must have a minimum of a 100-amp service with main disconnect.
- Cabins must have L1 and L2 connected to the service. The load must be balanced on the service panel to prevent overload.
- Services must be grounded using ½” ground rod and a minimum of #6 solid-wire.
- Service supply wire is to be American gauge and a minimum of #2-2-2 and a maximum of #00-00-00.
- Connections to the WPC&RC main electrical system will be done by the WPC&RC maintenance staff or other approved agent.
- Electric ranges are prohibited.
- Heat pumps, 220v air conditioners and 220v water heaters must be approved by Camp Director, Facilities Manager, and Conference Office prior to installation.

Guidelines for RV electrical hook-up:

- RV's are to be connected to a standard 30 or 50-amp RV box dependent upon the electrical requirements of the RV.
- RV boxes are to be mounted on a 4x4 post independent of the WPC&RC utility poles. “Drop down” connections off of the poles are not allowed. Supply to the RV box will be underground. Existing “drop downs” will be phased out.
- RV boxes must be grounded using a ½” ground rod and a minimum of #6 solid wire.

- RV's must be in good electrical order and connected to the RV box via a 30 or 50-amp plug. No adaptors will be allowed--the plug must fit the receptacle.
- Connections to the WPC&RC main electrical system will be done by the WPC&RC maintenance staff or approved agent.

General Electric Guidelines:

- Existing electrical service (cabins and RV) are subject to periodic inspection. Any non-compliant electrical services must be corrected within 60 days of notification.
- Electrical service work must be inspected by the WPC&RC maintenance staff.
- **Electricity is turned off to most areas on (or near) November 1st and restored on (or near) April 1st of each year.**

WATER SUPPLY CODES

- Interior water supply systems must adhere to the State of Indiana building codes.
- Water is provided to each Lot Lessee via an 'Iowa' yard hydrant which has been plugged to prevent ground water penetration. **No other supply system will be allowed.**
- In replacing or repairing broken hydrants, an 'Iowa' yard hydrant must be used.
- It is the Lot Lessee's responsibility to connect their cabin or RV to this hydrant via water hose. **No permanent connections will be allowed, as these hydrants must be drained each year for winterization.**
- **No hydrant shall be locked.** A flow-preventer is incorporated into each handle and may-be used to prevent unauthorized use.
- No hydrant may be moved without prior approval of the Facilities Manager. All work must be done by the WPC&RC maintenance staff or approved agent.
- New connections to the water supply system must be approved by the Camp Director and Facilities Manager, and the work must be done by the WPC&RC maintenance staff or approved agent.
- Winterization of cabins and RV's are the responsibility of their owners and not the maintenance staff of the WPC&RC.
- In winterizing cabins and/or RVs, owners must use RV (pink) antifreeze. **Do not use automobile antifreeze!**
- Water supply systems within a cabin should be designed to easily drain at the end of the camping season.
- Chlorine bleach should not be put into the sewer/drain system at any time.
- The connection hoses are the responsibility of the Lot Lessee and should be stored inside during the off-season.
- **Water supply will be shut off on (or near) November 1st and restored on (or near) April 1st of each year.**

WATER COLLECTION (SEWER) CODES

- Sewer connections must conform to the State of Indiana building codes.
- Pipe above or underground must be schedule 40. All connections must be glued.
- The use of "Fernco" connectors is discouraged in all but a few cases, and only to be used when approved by the WPC&RC maintenance staff.
- Vents must be capped to prevent rain water from entering the waste collection system.
- RV drain connections must have the threaded cap installed on the campgrounds drain pipe **when RV is not in use.**
- Existing cabins have been provided with a 4" main.
- **Any changes in connection must be approved by the Camp Director, Facilities Manager, and Conference Office and inspected by the WPC&RC maintenance staff.**
- New connections must be approved by the Camp Director and Facilities Manager, and the work be done by an approved agent, and inspected by the WPC&RC maintenance staff.

LANDSCAPING GUIDELINES

- The camp will continue to work on a landscaping plan for the entire camp.
- Trees and shrubs are not to be planted in utility easement areas.
- Tree or shrub planting by Lot Lessees must be in consultation with the Facilities Manager.
- Tree removals (on leased lots) must be approved by the Facilities Manager. The cost of removal will be shared 50/50 by WPC&RC and the Lot Lessee.

FIRE AND SAFETY CODE

- Cabins and mobile units must have a fire extinguisher in a convenient place.
- Wood burning stoves or fireplaces must be constructed properly, subject to inspection by the Facilities Manager before use, and properly maintained.
- Due to safety concerns, no refrigerator or freezer may be stored outside.
- Insurance on each cabin is provided through the Wabash Conference corporate insurance policy. The rate is based on the Actual Cash Value of the cabin. Participation in this plan is mandatory for all cabin owners.
- Insurance on any trailer at the camp is the **responsibility the lot lessee** to secure through their personal insurance agent.

LOT FEES, LEASES AND EXCHANGES

Lot Fees

- The annual **lot fee** is determined by the Wabash Park Camp & Retreat Center Board for each leased lot to help with the general maintenance costs of the camp.
- The annual **utility fees** are for electric, water, and sewer usage by those with cabins or mobile units on the leased lot(s).
- **Property Insurance** is carried by the conference, and cabin premiums charged by the Insurance Carrier are passed on to the lot lessee. Any property claims are to be handled by the conference office.
- The annual **Utility Upgrade fee** is \$145 until paid in full (20 years x \$145=\$2,900). The original cost was \$1,540 per lot. The principle balance can be paid at anytime. This fee was added to help cover the expense of the major upgrade of the water, electrical and sewer lines, to transition our waste water treatment plant, and connect in with Clay City utilities. The plan was designed so that Lot Lessees are paying 45% of this upgrade, the camp is paying 55%.
- Delinquent lot fee payments are handled according to WPC&RC Board approved policy.

Leases and Exchanges

- The Conference Office works with Lot Lessees in the securing of a leased lot or the exchanging of a leased lot to another party.
- A prospective Lot Lessee must be a member of the Free Methodist Church or obtain a “Letter of Exception” from Wabash Conference.
- A Lot Lessee must inform the Conference Office of any proposed transfer of a leased lot by returning the Articles of Agreement issued by the Conference, along with a notice of the desired transaction and the name and contact information of the one(s) wanting to lease the lot. This is necessary before the new “Articles of Agreement” can be prepared, and the transaction finalized.
- There is a one-time lease exchange processing fee of \$25 for each unimproved lot and \$50 for each improved (with utilities) lot payable to Wabash Conference.
- Lot fees must be paid in full before a lease exchange can be approved.
- Suggested fees **for leasing a lot from Wabash Park Camp & Retreat Center:**
 - \$125 for the basic lot + The camp will negotiate an agreement regarding utility upgrade fee
- Suggested fees **for transfer of a leased lot from a Lot Lessee:**
 - \$125 for the basic lot + The parties may negotiate an agreement regarding the current year’s lot fee, utility fee and unpaid utility upgrade fees, depending on the time of year when the agreement is made.
 - \$1,000 per lot when the utility upgrade fee has already been paid in full. The lot fee and utility fee may also be negotiated with the second party.

Process for Handling Delinquent Fees (including lot and utility fees, property insurance, and utility upgrade fees as defined above)

- The WPC&RC Board has established policies related to unpaid fees, including individualized payment plans for those unable to make their lot fee payments on a timely basis.
- We make every effort to work with lot lessees; however, if a lot lessee continues to not fulfill their obligations over time, their lots will be reclaimed by the conference. We will work with the lot lessee regarding any cabin or trailer on the lot (by allowing the lot lessee to remove their property, or we will sell it, and forward any proceeds from the sale after the past due fees have been paid).

DUMPING OF TRASH AND CAST-OFF FURNITURE

Each Lot Lessee is responsible for placing all trash and cast-off items in the dumpsters which are provided. The camp pays for this service. All trash and/or leaves must be bagged before placing in the dumpster. No branches/brush or construction debris is to be placed in dumpsters. There are no “dumping grounds” on our camp other than the dumpsters. Any item too large for a dumpster is the responsibility of the individual to haul to the land fill.

ACCOUNTABILITY TO THE CONFERENCE

The Wabash Annual Conference of the Free Methodist Church of North America, Inc. owns the campground. The “Articles of Agreement” is a "lot lease" agreement. The cabin and mobile units are owned by individuals. It is important that Lot Lessees realize that we are a “family” and be responsible for keeping their property neat and in good repair, and conform to the codes and guidelines set by the WPC&RC Board. Because Wabash Conference is a Not-For-Profit corporation, WPC&RC is used for not-for-profit activities. **Individuals who own cabins or mobile units are limited in the use of the facilities to a total of 3 weeks per year (21 days) for personal activities. This ruling was handed down from the courts in the mid ‘60s when the Clay County authorities attempted to tax cabins and mobile units.**

At no time are minors (persons under age 18) allowed to stay in a cabin without being accompanied by a parent or guardian. In addition, and in the interest of safety and community, the following guidelines will be enforced. Respect and consideration to any user group on the grounds is expected by all Lot Lessees.

Bikes or skateboards are not to be used on the Pavilion bridge or patio, on the walkway surrounding Heritage Lodge, or through the Splash Pad area.

Fighting, profanity, firearms (except for ceremonial purposes), fireworks, vaping and the use of tobacco, alcohol or illegal drugs are not allowed on the grounds.

Modesty and good taste in personal attire are expected while on the grounds. Shoes and shirts are required in the dining hall and Pavilion.

Pavilion showers are not to be used thirty minutes prior to or during any services.

The Wabash Park Camp & Retreat Center User Group guidelines apply to lot lessees related to the use of the splash pad and common buildings (unless special arrangements have been granted).

Quiet hour begins at 11 p.m. or one half hour following the last scheduled event on the grounds.

All pets on the campground must be confined or leashed. Pet owners are to promptly care for pet waste. Pets are not allowed in Indiana, Illinois, Bethany House, Heritage Lodge, Wesley Inn or common buildings.

See the complete list of Guidelines in the family camp brochure

CAMP FACILITIES MANAGER’S RESPONSIBILITIES

The WPC&RC Facilities Manager is responsible for the over-all maintenance, grounds care, and preparation of the camp for each user group. He is not the “repair man” for individual cabin and mobile unit owners.
